PROSPECTives to 2030: final conference

On November 30th and December 1st we presented our **PROSPECTives to 2030** to more than 60 participants and many guests!

PROSPECT2030 final conference's aim was to wrap up three years of project work and look ahead, with a toolkit of policy recommendations for a better use of public and private funds and seven regional action plans. We reflected on the lessons learnt from the current EU programming period, presented insights from our target regions and looked at a functional approach to **energy transition planning** and at the role of renewable energy communities to foster the energy transition.

Training package

Our **training package** is online! It includes all capacity-building and mutual-learning materials developed within the project and it is divided into 7 topics.

1. [Energy planning & energy transition](#)
2. [Energy efficiency in buildings](#)
3. [Financing energy efficiency](#)
4. [Sustainable transport](#)
5. [Renewable energy systems](#)
6. [Energy grids and infrastructures](#)
7. [Stakeholders engagement and the role of consumers](#)

You can download presentations and watch recorded sessions on our YouTube channel. For each topic you'll find a very short **introductory interview** at the top of the page!

Policy recommendations

Driving the change in the use of public funds for climate change mitigation: our [policy recommendations](#) aim to contribute to the 2021-2027 EU programming period, targeting decision-makers at EU, national and regional levels, but also the local administrations, non-governmental organisations and other opinion leaders who may influence the programming for the next seven years.

The sources are not limited to the assessment of the **low-carbon funding in the 2014-2020 programming period**, but also include the anticipated responses to the new strategic framework along the **European Green Deal** and the **"Fit for 55%" Package** and the financing planning in two dimensions, the Multiannual Financial Framework (2021-2027) and the **NextGeneration EU**. The recommendations incorporates results achieved by PROSPECT2030, in particular in terms of regional energy planning and discussion with the framework of various types of training activities.

We are also tailoring the recommendations to each **Central Europe macro-regional strategy** (*EUSDR, EUSAIR, EUSBSR, EUSALP*) in order to influence key decision makers!
